

Optical Fiber Connector Cleaner Box

Maintaining clean fiber optic connections is essential for reducing signal loss and ensuring optimal network performance. Even microscopic dust or oil residues on the connector surface can lead to increased insertion loss and network disruptions. The Fiber Optic Connector Cleaning Cassette is designed for safe and effective cleaning without leaving residues.

With its cassette-based cleaning mechanism, this tool provides over 500 cleaning cycles, ensuring that fiber optic connectors remain contamination-free. Unlike single-use cleaning wipes, this reusable cassette offers a cost-effective and eco-friendly solution for technicians working in FTTH, GPON, data centers, and telecom environments.

Features

- Designed so that all operators can consistently achieve
- high quality cleaning without alcohol or other solvents.
- Palm-sized and lightweight. Easy and safe to use whether
- in the engineering lab, on the production line, or in the field.
- Cleaning tape is replaceable and cost effective.
- One cleaning tape can be used for over 500 wipes.
- Has excellent anti-static properties to avoid reattachment of dust to the ferrule after cleaning.
